Subject Index

adaptation, 445
age-structure, 351
AIDS, 345
anatomy, 19

band pattern, 255
biophysics, 320
biosystems, 367
blood flow, 329
brain, 559

cancer, 1
capillary – tissue exchange, 289
cell debris, 209
cephalopods, 19
chaos, 313, 465
circuits, 414
cognition, 202
control, 699
couple stress, 329
cycle, sleep – wake, 324

defence, 517
delays, 503
development, 121
diffusion, 697
dissipative structure, 255
distributed processing, 202
DNA, 209
dynamical
  diseases, 227
  phenomena, 572
  systems, 313

EEG, 559
embryo, 121
entrainment, 661
enzyme kinetics, 579
epimorphic regeneration, 595
epistemology, 193
evolution, 193, 567, 635

flow cytometry, 209
fractal, 465
  dimension, 559
fruit
  fly, 199
  trees, 379

HIV, 345
Hodgkin – Huxley, 411
holography, 19

induction, 681
information, 445, 568
ion transport, 255
irreversible processes, 326

kinetics, 423

lifespans, 187
Lotka – Volterra, 465

membranes, 697
metabolism, 699
metastability, 379
microcirculation, 329
microorganisms, 493
mite outbreak, 379
models, 572
mutant, 635

neural systems, 143
neurons, 43, 411
neuroreceptor distribution, 423

optimal control, 227
optimization, 635
osmotic flow, 531

parallel processing, 202
permeability, 547
persistence, 517
pest control, 199
photosynthesis, 699
physiology, 699
population
  dynamics, 503
  genetics, 200
  models, 67, 351
predator – prey, 379, 517

radioligand, 423
regeneration, 595

scaling, 345
selforganization, 326
sequence, 77, 97
seropositivity, 345
signalling, 661
significance levels, 77
similarity functions, 77
sleep, 324
stability, 67, 327
steady state, 579
survival dynamics, 187
synapses, 414
systems analysis, 199
systole, 35

thermal death, 493
thermodynamics, 568
transport, 697
tumors, 681

unstirred layer, 531

Vespa orientalis, 661

weighting functions, 97
